

# Sprint 2 Retrospective - 8/10/2020

Members present: Jerrayl, Winnie, Ajay, Mehmet, Juwey

Completed:

8	Employer, Job-seeker	Sign in with my Google/Microsoft Account	Authenticate conveniently and securely	Medium	winnie-firebase-gauth
9	Job-seeker	Add pages to portfolio on demand	Control how information on portfolio is split up	Medium	ajay-manage-pages, jerrayl-pages-frontend
10	Job-seeker	Delete comments	Remove spam comments to prevent clutter	Low	mehmet-comment-CRUD-backend, mehmet-comments-with-redux, mehmet-comment-unified-frontend
11	Viewer	Edit comments	Add/remove information from comments	Medium	mehmet-comment-CRUD-backend, mehmet-comments-with-redux, mehmet-comment-unified-frontend
12	Job-seeker	Share social media links for main platforms (twitter, instagram, facebook)	Provide further contact/showcase information	Medium	ajay-social-media
13	Job-seeker	Set privacy on each post individually	Control what information is made available publicly	Medium	jerrayl-item-unified-frontend
14	Employer	View protected content on a portfolio	Have a full picture of what the job-seeker offers	Medium	juwey-privacy-checking, juwey-view-portfolio-content
15	Job-seeker	Customize the layout of the portfolio	Have the portfolio reflect my aesthetic sensibilities	Medium	jerrayl-item-unified-frontend

## Post Sprint Team Discussion

### What went well

- Improved code review process (calls to showcase completed work)
- Communication with client
- Working on subsystems significantly reduced dependencies on the work of others
- Quick team response time
- Sprint Planning allocated clear tasks for each member
- Deployed app to heroku
- Followed user stories more closely during sprint planning, github branches are linked to specific user stories
- Code style was neater

### What didn't go well and why

- Not all goals were completed
  - Could have better inter-team communication
- Noticeable bugs during showcase to client
  - Insufficient testing before showcase
- Convoluted deployment process
  - Did not finish CI/CD pipeline before sprint end
- No clear list of questions for client
  - Did not brainstorm a list of concerns beforehand
  - No clear idea of Component layout of project

### What can we change in the next sprint

- Complete Component diagram and Class diagram for project
- Testing guideline/document
- CI/CD Pipeline
